

(LARGER VERSION OF MASK ON NEXT PAGE)

The Mask

A lot of people have made really sophisticated art using Desmos (see <https://www.desmos.com/art> for examples). In this project you will be recreating the mask shown and adding features to make it more personal.

Your project will be scored based on the criteria below:

7 = accurate re-creation of the mask and significant additions to the mask using varied equations and inequalities.

6 = accurate re-creation of the mask and significant additions to the mask using varied equations or inequalities.

5 = accurate re-creation of the mask and additions to the mask using simple equations or inequalities

4 = accurate re-creation of the mask and no additions to the mask or nearly accurate recreation of the mask and simple additions.

3 = nearly accurate re-creation of the mask and no additions.

2/1 = inaccurate re-creations of the mask.
