

Statistics Project Ideas

REMEMBER: YOU NEED TO COMPARE 2 VARIABLES

1. HS students and cheating
 - a. Compare upperclassmen and lowerclassmen
2. Music and productivity
 - a. Upperclassmen and lowerclassmen vs classical and rock music
3. Area you live in and music you prefer
 - a. Does the neighborhood you live in affect your taste in music?
4. Importance of fashion (4 point scale) vs gender
5. Do people who wear glasses think they look smarter compared to people who don't?
6. Adidas vs Nike compared upperclassmen to lowerclassmen
7. How many free periods related to junior/senior/freshman/sophomore?
8. How much have people spent on shoes?
 - a. Gender
 - b. Age (student, 20-30, 30-45, 45-60, 60-older)
9. Do you have a job compared to age? Compare to class level?
10. GPA by grade level? Does it change as students go through high school?
